CentralLogic ✚ ®

On-Call Scheduling
Orchestrate. Navigate. Elevate.

Central Logic is a healthcare access and orchestration solution that comprises not only software but also a surrounding ecosystem of resources that are purpose-built to provide system-wide and regional access to care, allowing you to acquire and retain more patients, improve patient outcomes, and increase operational effectiveness.

Our holistic solution includes everything you need to ensure that patients get the best care as soon as possible. We provide centralized management of patient transfers, give you system-wide and regional visibility to available beds and PPE, provide integrated and real-time provider scheduling and calendar data, provide automated, real-time access to transport requests, and deliver real-time analytics into every facet of your health system operations.

We also deliver a complete consulting engagement by our team of clinicians—experts in healthcare access and transfer center operational processes – at no extra charge. And we deliver contractually guaranteed growth so you'll realize ROI faster.

■ Central Logic On-Call Scheduling

You can't complete a transfer without locating the right physician to accept the patient. Central Logic On-Call Scheduling provides centralized physician and provider scheduling and calendar data that is visible to your entire health system in real time so that patient transfer delays never occur because you can't identify or locate the on-call physician.

Central Logic On-Call Scheduling helps health systems avoid unnecessary care delays for patients by enabling faster approvals for transfer and hospital admissions and by preventing patients from being inadvertently transferred to facilities with insufficient provider staffing.

Get to the 'yes" as quickly as possible with an on-call scheduling solution that helps you:

Contact the right provider with your first call: Customizable physician and provider calendars and schedules can be shared, combined, and redeployed to provide real-time visibility to anyone in the health system so that your first call is always to the provider on call

Streamline efforts: Scheduling changes for the entire health system are immediately visible to all users, so there's never any duplication of work

Increase accuracy: Holistic scheduling data is automatically captured, stored, and presented in a single centralized location, eliminating manual mistakes and ensuring that only available providers are contacted

Integrate: Utilize our vendor-agnostic, secure, Microsoft Azure-based platform to integrate data from EHRs and other healthcare IT systems and ensure you have insight into your patients' most current medical information as you transfer them to the right provider and facility for their needs

Make decisions in real time: Gain in-the-moment line-of-sight into physician and provider availability so you can make decisions and improvements when it counts
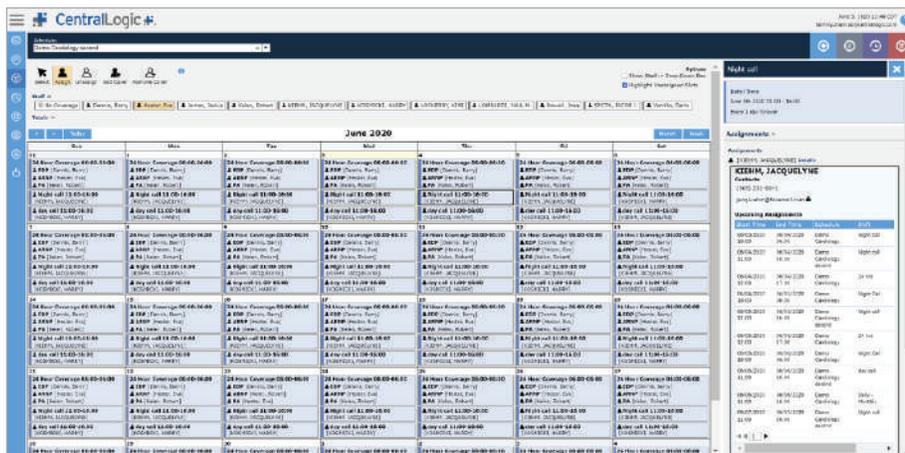

Report on critical metrics: Ensure you're tracking, analyzing, and able to easily report key performance metrics like physician response times and acceptance/denial rates

Ensure security: Our communications engine ensures all pages, emails, and texts are fully encrypted so that your transmissions are secure and HIPAA-compliant

Get up and running quickly: Central Logic's SaaS-based platform allows your solution to be stood up within hours or days – not weeks or months

Rely on the experts: Offload your concerns to the specialists on our tenured, clinician-led consulting team, who have decades of experience ensuring patients have access to the fastest and best care possible
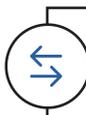

■ **Central Logic includes everything you need to ensure that patients get the best care possible as soon as possible. Our holistic solution includes:**

Transfer
Centralized enablement, management and automation of all aspects of patient transfer, whether into, out of, or throughout the health system

Intelligent Transport
Automated, intelligent emergent and non-emergent transport coordination with real-time tracking and geo-fencing so you know exactly where the patient is in their journey to or from the facility

Bed Visibility
System-wide and vendor-agnostic visibility to staffed and non-staffed beds

On-Call Scheduling
Integrated and centralized physician and provider scheduling data that is visible to the entire health system in real time

Analytics
Real-time, dynamic dashboards that provide clear visibility into every facet of the health system's access operations so you can understand how you're meeting goals and easily share metrics with governing authorities

Consulting
Comprehensive clinician-led engagements with our team of experts, who provide best practices around everything from staffing and workflow to provider engagement and crisis preparation and response

About Us

Central Logic was founded on the belief that health system growth and success depends on delivering patients safe, quick, and efficient access to the right care at the right location without delay. We remain dedicated to the successful orchestration and navigation of patients through the entire continuum of care, regardless of whether patients have chronic conditions, one-time ailments, or are healthy individuals who want to keep it that way.

At Central Logic, we know that "access" all comes down to **making it easier for patients and providers to work with you.** Our experience orchestrating more than 10 million transfers has taught us that if we can help you achieve your access goals, your organization will achieve its business goals and your patients will thrive.
